Growing Michigan’s Economy by Investing in the Forgotten Middle

Middle-skill jobs, which require more than high-school, but less than a four-year degree, make up the largest part of America’s and Michigan’s labor market. All too often, key industries in Michigan are unable to find enough sufficiently trained workers to fill these jobs. As a result, job creation and economic growth are stifled. We can’t afford that—particularly now—in Michigan.

Years ago, our nation established a number of workforce development programs to meet this demand by preparing Michigan’s workers for middle-skill jobs. But since then, our federal education and training policies have largely forgotten about these jobs, and investments in the programs that prepare middle-skill workers have plummeted. As a result, in Michigan too many workers struggle to find decent jobs and too many employers struggle to find skilled employees. Our federal policymakers—including Michigan’s congressional delegation—must address the investment shortfall in the forgotten middle of the labor market. Michigan simply can’t afford the lost jobs and productivity that complacency brings.

Demand for Middle-Skill Jobs is Strong, Will Remain Strong in Michigan

Middle-Skill Jobs are the Backbone of Michigan’s Economy

Middle-skill jobs are key to our nation's health, its infrastructure and its economic growth. Many of these jobs cannot be outsourced: from the care of our sick and elderly, to the repair of our computerized cars, to the running and maintenance of our factories' advanced machinery, to the construction of our nation's bridges and buildings. Middle-skill jobs can provide good wages and career paths for America’s and Michigan’s workers.

Examples of High-Demand Middle-Skill Jobs in Michigan	Industry	2009 Median Annual Earnings*
Police and Sherriff’s Patrol Officers	Protective Services	\$51,480
Civil Engineering Technicians	Engineering	\$47,350
Carpenters	Construct	\$42,420
Automotive Mechanics	Installation, Maintenance, Repair	\$36,770
Truck Drivers, Heavy and Tractor-Trailer	Trucking	\$36,730

* 2009 median annual earnings for all occupations in Michigan = \$33,740

Michigan's Skills Mismatch: A Middle-Skills Gap

In 2009, about 50 percent of Michigan's jobs were in middle-skill occupations. But only 45 percent of the state's workers likely have the appropriate training for these jobs.

Michigan's Competitiveness Requires Federal Investments in Training for Middle-Skill Jobs

To maintain a strong economy, Michigan must address its middle-skills gap by investing in a skilled workforce. Training just another 5 percent of Michigan's workforce for middle-skill jobs would require a new investment, beyond existing state and federal programs, of at least \$1 billion or 3.3 times Michigan's current federal funding for all job training, adult education, vocational education, and financial aid for community college students.

Michigan's Middle-Skills Investment Gap
