

Lack of access to skills training hurts the District of Columbia's workers and businesses

Every day, in communities across our nation, workers seek out opportunities to ensure their families can thrive. At the same time, businesses are anxious to hire skilled workers—people trained for jobs in growing industries like healthcare, medical technology, IT and software, and advanced manufacturing—as well as tradespeople like plumbers and electricians.

These jobs*, which require education and training that falls between a high school diploma and a four-year degree, are the **backbone of the American economy** and they depend on a skilled workforce ready to fill them.

Skills training is the key to filling in-demand jobs—yet without access to skills training and education, workers are locked out of opportunities to succeed.

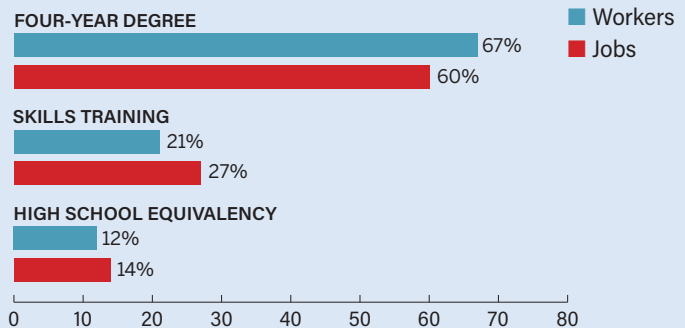

A quarter of jobs (27%) require skills training beyond high school, but not a four-year degree.

DISTRICT OF COLUMBIA'S JOBS BY EDUCATION REQUIREMENT, 2018

But too few workers can access the skills training and education needed to fill in-demand jobs.
